EfficientIP's Smart DDI solution offers integrated management of DNS-DHCP-IPAM and VLANs-VRF with devices and their network interfaces in a single process. This unique comprehensive DDI solution delivers high availability, elastic scalability and advanced security, all built on a policy-driven management and automation foundation. (SOLIDserver, DNS Blast, IPAM)

 nyansa

Understand Wi-Fi behaviour per user, location SSID and client O/S in real time. Voyance actively recommends specific configuration actions to fix poor user performance, where to make them, how to make them, and the predicted impact of these changes, all from a central console. Qualify effectiveness of Wi-Fi deployments quickly and effectively. (Voyance; Crawler)

Data tapping and aggregation for better visibility and analytics. Combine, filter and re-distribute from any copper or fibre port to any copper or fibre output port for application, network or security analytics. ProfiTap's broad range of product covers all your tapping needs. (ProfiTap, Profishark)

Maximize Network Value

24x7 Real-time Network Traffic Capturing and Recording from critical network points for in-depth analysis. Colasoft offers real-time capturing, analysing, and storing sustained traffic at Gigabit line rates for all data flows and packets. It also provides scalable extensive storage capacity varies from 1TB to unlimited storage. (nChronos; Capsa)
